"Thank you for allowing us to introduce you to our family of products. These descriptions merely scratch the surface so please visit our website or call our office for more information."

ELECTRICAL

From new building construction to the complete installation of industrial line equipment, top flight experience and service is what you can expect. Known throughout the industry as a thought leader and progressive with innovation, Teems is a proven installer of non-woven & extrusion equipment, service mains, feeders, fiber optics and communications. Diverse in talent and rich in experience, our electrical crews can handle anything you throw at them from luxury homes & restaurants to medical facilities, schools, government agencies to Industrial installations that span the globe. We have been fortunate to work for smaller companies in our own backyard as well as corporate giants both nationally and internationally.

LIGHTING

Teems Lighting has been successful in helping companies create a better quality of light while simultaneously saving them 50 to 70% energy consumption. Our crews deploy locally as well as all over the nation to install quality products that pay for themselves quickly by way of reduced energy costs. We can also provide you with energy and lighting audits that inform business owners and stakeholders where their energy costs are and advise them how simple changes can drastically improve their profits.

AUTOMATION

The Teems Automation group provides custom control system designs that accommodate the strictest of customer's standards and expectations. From drafting electrical schematics to custom built equipment to programming a wide variety of PLC's, this team consistently delivers to meet customer specifications. Be it retrofit services for existing controls, upgrading or replacing outdated or obsolete components, Teems Automation is poised to help you achieve optimal efficiency with your systems.

MECHANICAL

Teems Mechanical's diverse and talented staff has the ability to develop or modify anything created from raw steel. From catwalks, to mezzanines, to guardrails and beyond, they are eager to construct your project with a focus and diligence that yields a superior product for a competitive price. From sheet metal to structural steel, from building maintenance to machine maintenance we can weld or fabricate anything you can dream up. With state of the art equipment and a top flight staff, Teems Mechanical is the industry standard in its space.

BLOWPIPE

In 2013 Teems acquired "Blowpipe Sheetmetal Company". We were fortunate to have many of their gifted staff come to work with us which has been a perfect complement to the Mechanical division. This division has become a shining star able to generate world class service and superior product in the blowpipe and fabrication space. Call or email them for all your blowpipe needs.

STEAM

Industry leader Teems Steam continues to push the boundaries of innovation. This highly sought after group of talent stays in demand by providing superior service at a competitive price. Having forged relationships with manufacturers of the world's premier product lines of boilers and burners, the steam division can offer the best product at the best price. Fully trained technicians have the ability to do R, S & U Code work in our own facility or on site at your plant or place of business. This division also offers a Rental Boiler service should your boiler go down or require service when you need to stay in operation. This team has created operational efficiencies for businesses all over the nation. Contact them today to get the edge you need to stay in compliance and maintain peak performance.

HVAC

Capable of installation, maintenance and service of all commercial and industrial equipment, Teems HVAC keeps your systems running and up to date. Degreed technicians are at the ready for any number of applications including extrusion processes, clean rooms, environmental chambers, motor control, communications centers or even cooling and heating your office. This go-to team has the experience to service a multitude of applications including package roof top, chilled water and make up air units. With Teems HVAC you'll enjoy competent service from technicians who receive regular educational updates on advances in technology for their field. In addition, Teems HVAC provides 24/7 on-call service including weekends and holidays.
